5 ADVANTAGES AND DISADVANTAGES

Advantages:

- It allows for more effective sales and marketing.**
- It can speed up the sales conversion process.**
- It enables widely dispersed teams to work closely.**
- Can improve customer loyalty through exceptional experience.**

Disadvantages:

- ✧ You need internet access.
- ✧ Long hours.
- ✧ It may not suit every business.
- ✧ Security concerns associated with centralised data.

APPLICATIONS:

- ✓ Planning your operations.
- ✓ Tracking customers.
- ✓ Collecting data for marketing
- ✓ Improving interactions and communications.

CONCLUSION:

Customer relationship management enables a company to align its strategy with the needs of the customer in order to best meet those needs and thus ensure long- term customer loyalty.

However ,in order to be successful in these aims ,the different company department have to work together and use measures in a coordinated fashion . This purpose is achieved via a customer database which is analysed and updated using CRM software.

This approach will be of particular interest to companies operating in highly competitive markets where it is difficult to attract new customers.
